

Pontreux Nov 11 ⁶³

My dear Gray

I answer you, of the
29th Oct in a hurry as I am very
busy.

Cracca will be the best
name for *Tephrosia* Peet
Craccoides.

Wright's new *Scrophularia*
is certainly the beauty of the
genus - all the rest being
so very ugly.

A vol. under cover open at
both ends not weighing more
than 1 lb goes by our post
for 8/- it may have
written matter or blank
paper in it but no letter.

A pamphlet however
light - if even under 10/- if

under cover open at the end
pay 8^d - to pay a letter
postage it must be sent
as a letter.

Any number of pamphlets
under one cover making
together under 18^d pay
6^d

Had you ever any duplicates
from the late Semann?
any of Griffiths, Khamya
and Malacca plants for
instance - if not there
are a few good things
I can send you - Pray
tell me when next you
write.

I shall probably want
half a dozen reams of

the genus cover paper
for Semann's Herb. for
Cambridge but will let
you know when next
I write

Yours very sincerely

George A. Smittham
